

W6V4SD2 SuperDrive Collated Screw System

Includes:

- #2 Phillips Bit (Installed)

Features:

- [Watch the video demo](#)
- **Ideal for** drywall to wood and drywall to metal installations
- **Features a no-load speed of 0-4,500 RPM and a max torque of 81.5 in-lbs**, ideal for faster fastening applications
- **Tool-free depth of drive adjustment** requires only a press of a block and a turn of the knurled wheel to increase or decrease the depth of the screw
- **Tool-free screw length adjustment** automatically adjusts as the screw lengths change from 3/4" up to 2-3/16" in length for fast and seamless transitions on the job
- While other tools require multiple attachments for different length screws, the SuperDrive system is ready for work given it **fastens from 3/4" to 2-3/16" screws with diameters from #6-#12**
- **Powerful 6.6 Amp motor** (750 Watts of input power)
- **Body of the screwdriver is covered in a soft, yet durable elastomer compound**, which provides a comfortable and slip-resistant grip
- **Belt hook** incorporated into the body of the screwdriver adds convenience
- **Large trigger with lock-on** for continuous use is designed for comfort and control during operation
- **Gear case and inner cover are constructed out of aluminum** to add durability and increase tool life
- **Plastic cover** keeps the gear case from being scratched or damaged during extreme use
- **24.6 ft power cord** is unusually long to allow movement without the hassle of relocating to different power outlets
