

## CR13VBY 12 Amp Low Vibration Reciprocating Saw

### Includes:

### Features:

- Case (327054)
- All Purpose Blade (725362)
- [Watch the Hitachi Tool Corner video for this recip saw](#)
- **User Vibration Protection (UVP) technology** incorporates a counterweight mechanism that reduces full-load tri-axial vibration by over 65% significantly reducing vibration transfer to the user
- **12Amp motor** provides aggressive power thanks to 1370 Watts, resulting in a faster cutting speed and higher efficiency on the job
- **Variable speed dial and trigger** allow the user to adjust the cutting speed optimally for the application for less waste and more control
- **2 mode cutting mechanism**- straight mode and "swing" mode that produce significantly less rebound effect as compared to traditional orbital action for a more efficient cut in wood materials
- **Tool-less blade change** with a simple press of a lever for quick replacements
- **Stroke length of 1-1/4" at 0-3,000 SPM** resulting in rapid cutting performance
- **Constructed with a triple seal design** to protect from dust and debris generated during use- also protects from water waste when cutting into pipes
- **Durable front cover** is made from double molded elastomer and plastic to protect from heat and prevent slippage
- **Ergonomic shape and slip/heat resistant grip** are easier to handle and make it easy to use all day

### Includes:

- Case (327054)
- All Purpose Blade (725362)

### Specifications

Amps	12
Rating	120V AC
Watt Input	1,370
No-Load Speed	0-3,000 SPM
Stroke	1-1/4"
Variable Speed Control	Trigger & Dial
Full-Load Triaxial Vibration	9.0 m/s <sup>2</sup>
Cutting Modes	2
Soft Grip Handle & Cover	Yes
Triple Sealed Construction	Yes
Reversible Blade	Yes

Tool-less Blade Change	Yes
Tool-less Shoe Adjustment	Yes
Length	18.3"
Weight	9.7 lbs
